Greenshields Project Cargo

# GREENSHIELDS PROJECT CARGO

going worldwide since 1992

**GREENSHIELDS  
GROUP**

## project cargo

As the name suggests, the core business of **Greenshields Project Cargo** is the management of heavy and out-of-gauge cargo such as: industrial vehicles, prefabricated buildings, machineries, equipments and complete industrial plants.

The handling is performed with special equipment integrated with multimodal transport operations including vessels and aircraft chartering, if necessary.

Our supply management system offers a complete service: from the feasibility study to the release of our own shipping documentation, including customs clearance and the issue of insurance certificates both at the loading site and destination. We create a tailored service keeping into account every single transport requirement.

## perishable

**Greenshields Project Cargo** offers a particularly careful and accurate refrigerated service that gives guarantee of a constant control of the temperature. Technological advanced devices measure the temperature and send alarm signals whenever changes occur.

This imply that the goods are kept at a fixed-temperature, within very small temperature variations, from loading to unloading points.

The controlled temperature transport service is available both for ocean, land and air cargo.

## remote destinations

**Greenshields Project Cargo** was at its first steps a logistic support to international humanitarian organizations. This allowed to develop a worldwide network of collaborators particularly active in remote destinations that are generally considered as backwarded and with a high level of risk.

We ensure expertise and flexibility to overcome any kind of problem arising in environments with a lack of proper logistic infrastructures, hard-shelled bureaucracies and political instability.

Amongst the most noteworthy destinations reached by us: Afghanistan, India, Pakistan, Bhutan, Nepal, Ciad, Congo, Mozambico, Nigeria, Uganda, Somalia, Sudan, where we are particularly specialized in door deliveries.
